

# Agimat FX — Privacy Policy

Version 2026-10-16

This policy explains what personal data Agimat FX ("we", "us") collects, why, and what you can do about it. It covers the website agimatfx.com, our store on Whop, and our hosting service. Agimat FX is operated by Dennis Buchholz, who is responsible for your data. Contact: hello@agimatfx.com.

## 1. What we collect

**When you buy through Whop** - Your name, email address and the details of your subscription. - Payments are processed by Whop. We do not receive or store your card details.

**When you use our hosting service** - The login details of the trading account you ask us to host: account number, server and password. You send these through our secure portal, never through Whop, email or chat. - The settings you choose for the EA. - Technical data about your hosted terminal, such as whether it is running and connected, which may include basic account figures such as balance and equity.

**When you visit agimatfx.com** - If you join our launch list: your email address. - Visit statistics: Cloudflare Web Analytics, which does not use cookies. - Whop's tracking pixel, which records page views so we can measure visits and advertising.

**When you contact us** - Your email address and whatever you choose to tell us.

## 2. Why we use it

- To provide the service you paid for: setting up, running and monitoring your hosted terminal.
- To handle billing and your subscription.
- To answer your questions and give support.
- To send the one launch email you signed up for. Nothing else is sent to the launch list.
- To understand how many people visit the website and where they come from.
- To meet legal obligations, such as keeping billing records.

We do not sell your personal data, and we do not use your trading account login for anything other than connecting the hosted terminal to your account.

## 3. Who else handles it

- **Whop** processes payments and subscriptions, and runs the tracking pixel.
- **Cloudflare** hosts the website, provides visit statistics and forwards our email.
- **Our server provider** hosts the server the terminals run on.
- **Your broker** holds your trading account. We connect to it; we do not share your data with it beyond what connecting requires.

Each of these handles data under its own privacy policy. We share only what each needs to do its part.

## 4. How we protect it

Login details are sent through an encrypted connection, are accessible only to us, and are used only on our server, which is protected with two-factor authentication. No system is perfectly secure, but we limit what we keep and who can reach it.

## **5. How long we keep it**

- Trading account login details: until your subscription ends. We then remove your account from our terminal and delete your login details.
- Subscription and billing records: as long as the law requires.
- Launch list: until the launch email is sent, or until you unsubscribe, whichever comes first.
- Support messages: as long as needed to help you, then deleted.

## **6. Your rights**

You can ask us to show you the data we hold about you, correct it, delete it, or stop using it for a particular purpose. Write to [hello@agimatfx.com](mailto:hello@agimatfx.com). If you are in the Philippines, you can also complain to the National Privacy Commission; if you are in the EU, to your national data protection authority.

## **7. Children**

Our products and services are for adults. We do not knowingly collect data from anyone under 18.

## **8. Changes**

We may update this policy. The version date at the top shows when it last changed. If a change affects how we use data you have already given us, we will tell you by email first.
